|--|----------|
| Preface | 6 |
| Part I. Guidelines for practical trainings..... | 9 |
| Semantic module: Periods of child's age. Neonatal period | 9 |
| Periods of child's age, their characteristic and peculiarities | 9 |
| Features of neonatal period | 18 |
| Semantic module: Physical and neuropsychical development of children | 25 |
| Physical development of children and anthropometry | 25 |
| Estimation of physical development of children | 29 |
| Psychomotor development of children. Estimation of psychomotor development of children..... | 34 |
| Semantic module: Anatomic and physiological features, methods of physical examinations and semiotics of diseases in children | 42 |
| The nervous system in children | 42 |
| The skin and subcutaneous fatty tissue | 48 |
| The skeletal system in children | 54 |
| The respiratory system in children..... | 60 |
| Anatomic and physiologic features of the respiratory system in children..... | 60 |
| Methods of examination of the respiratory system in children | 60 |
| Semiotics of affection of respiratory system in children | 67 |
| The cardiovascular system in children..... | 75 |
| Anatomic and physiologic features of the cardiovascular system in children. Methodic of examination of the cardiovascular system in children | 75 |

| | |
|---|------------|
| Semiotics of affection and basic diseases of the cardiovascular system in children | 80 |
| The digestive system in children..... | 86 |
| Anatomic and physiologic features of the digestive system in children, methodic of examination..... | 86 |
| Semiotics of diseases of the digestive system | 93 |
| The urinary system in children..... | 99 |
| The endocrine system in children | 107 |
| System of blood in children | 112 |
| Part II. Case History of the child..... | 121 |
| I. Passport part..... | 121 |
| II. Patient's complaints..... | 121 |
| III. History of the present disease | 121 |
| IV. Anamnesis of patient's life | 122 |
| V. Objective examination of the patient | 125 |
| Estimation of physical development..... | 131 |
| Examination of the skin | 134 |
| Examination of subcutaneous fat | 134 |
| Examination of the peripheral lymph nodes | 135 |
| Examination of the muscular system | 136 |
| Examination of the skeletal system..... | 138 |
| Examination of the respiratory system | 140 |
| Examination of the cardiovascular system | 149 |
| Examination of the digestive system | 157 |
| Examination of the urinary system | 165 |
| Examination of the nervous system | 167 |

| | |
|--|------------|
| Examination of the endocrine system | 177 |
| List of the practical skills | 180 |
| List of laboratory and instrumental methods of examination | 183 |
| Part III. Syndromes of the main childhood diseases | 184 |
| General pathological syndromes | 184 |
| Fever syndrome | 184 |
| Intoxication syndrome..... | 186 |
| Syndromes of consciousness impairment | 187 |
| Syndromes of disorder of physical development..... | 188 |
| Syndromes of skin lesions..... | 189 |
| Symptoms of hypodermic fat lesions..... | 191 |
| Schematic description of the main pathological syndromes of the child's diseases | 192 |
| Appendixes | 215 |
| Appendix 1. Functional, instrumental and laboratory methods of examination in clinical pediatrics | 215 |
| Appendix 2. Extract from the clinical protocol of medical supervision of healthy child under 3 years old | 222 |
| Literature | 237 |
